CONTINUING GUARANTEE

USDA/FDA REGULATIONS

This is to certify that packaging provided by Novolex Shields-Yakima that is considered food grade material for food contact surfaces does not contain any regrind material and is manufactured with virgin resin and covers the use of polyethylene, nylon and EVOH film products for contact or direct food contact and complies with the Federal Food, Drug, and Cosmetic Act and all applicable food additive regulations. Shields products **do not apply** for articles used for packing or holding food during cooking.

1. The guarantee is consistent with the Food and Drug Administration Regulations, 21 CFR 177.1520, etc.
2. Products are plain or printed polyethylene, nylon and EVOH bags or sheets.
3. Shields products are to be used for packing, transporting or holding food at Fahrenheit temperatures not to exceed: Minimum -40 degrees Maximum +180 degrees

While we do not test each raw material we purchase for production, we do exercise good product stewardship and seek information concerning raw materials composition from our suppliers.

A handwritten signature in black ink that reads "Tony Pynch".
